

WELCOME TO THE FINNISH SCC TEAM!

Team Norppa's logo (2023)

- Today's agenda:
 - Student Cluster competition in detail
 - Getting to know each other
 - Coffee break and snacks!
 - CSC's Supercomputing environment
 - Logging into Mahti

FIRST AND FOREMOST

- The advisors
- Contact information

CREATING A USER THROUGH MYCSC

- Go to our GitHub page at <https://github.com/cschpc/student-cluster-competition-2024>
- Go to the folder: Training/01-kickoff
- Read the instructions and create a user through MyCSC
 - We'll use this to give you access to Mahti, Puhti and Lumi

SCC@SC24

COMPETITION DETAILS

AS A REMINDER

- The aim of the competition
- SCC vs. IndySCC
- Teams
 - Students
 - The role of the advisor
- Supercomputing conference
 - 17.11.-22.11.

INDYSCC VS SCC

For now, our main focus is IndySCC

Plans to apply for the on-site competition
also

Cloud vs. Hands-on hardware

Few nodes on-site vs. hundreds of nodes
over cloud

Remote vs. On-site

Virtual conference attendance

INDYSCC TASKS
AND HARDWARE

WHAT DOES INDYSCC ENTAIL?

- Access to a cloud computer provided by the organizers
 - 5-20 per team during the competition, 100-300 during "HPL Hero runs"
- Training webinars and assignments before the main competition
 - 4 webinars
 - 4 training assignments
- Poster creation of the team
- A 23-hour "HPL Hero run"
 - Benchmarking a large cluster
- The 48-hour competition

THE CLOUD SYSTEM

- Over Chameleon Cloud
- Around 100-300 bare-metal nodes in the whole cloud system
 - Intel Xeon E5V3 CPU-nodes during '22 and '23
- 5-20 nodes during the training and competition
- Accessed through an UI over the web or through a terminal

WEBINARS AND ASSIGNMENTS

- Over the span of a few months (2-3)
 - Every 2 weeks
- Information about the different applications
- Google classroom

HPL HERO RUN

- A few weeks before the final competition
- Access to the whole cluster
- Running the HPL benchmark application over 23 hours
 - Trying to tune it and achieve maximal performance

THE 48-HOUR FINAL COMPETITION

- 48 hours non-stop
- The cluster can be initialized beforehand
- All assignments will be published at the beginning
- 2 Scientific applications, 1 mystery application
- Results need to be downloaded to a submission server before the 48-hour mark

APPLICATION PERIOD: 1.3.- 15.5.

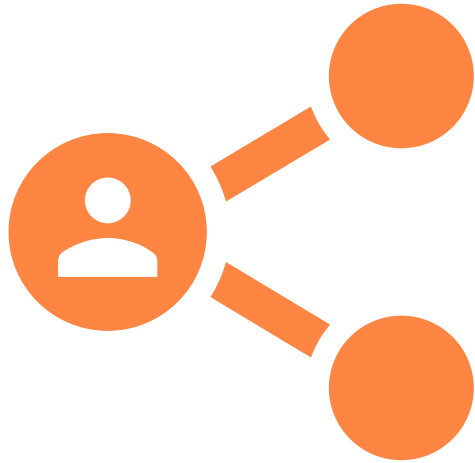

In the application there are sections asking about:

- The skills and studies of the team members
- The support that the team gets for the competition
- Diversity of the team members
- How the team members would benefit from attending
- Hardware that the team would compete with

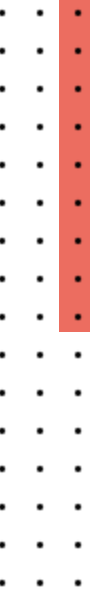

QUESTIONS
ABOUT THE
COMPETITION
DETAILS?

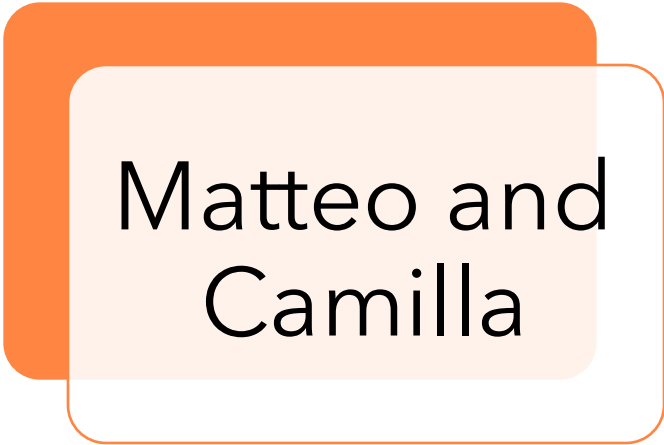

GETTING TO KNOW EACH OTHER

- Task: In pairs, give us a short introduction of the other person
- Be sure to ask some of the following:
 - Their name (important!)
 - Their study track
 - Their hobbies or interests
 - What do they hope to learn from the student cluster competition?

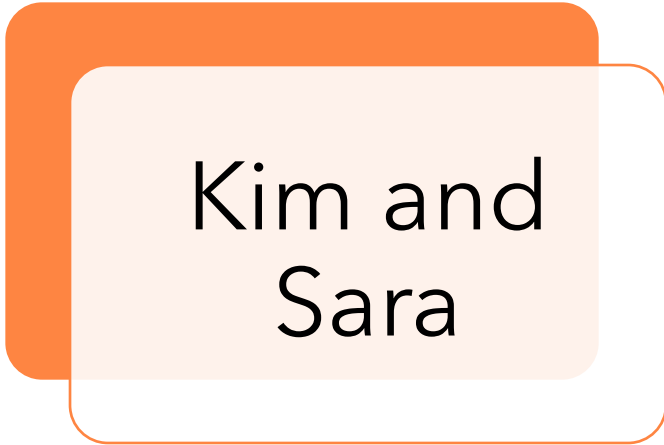

THE PAIRS

Matteo and
Camilla

Santeri and
Hex

Kim and
Sara

LET'S DISCUSS PRACTICALITIES

- Preferred platforms for communication?
 - Discord, Slack,..?
- Meeting schedule and preferred days
 - Next meeting during the 13th week (25.3. - 29.3.)?
